I have heard their blogs for years, attended Holly's wildly popular eCourses on blogging and a pretty much a groupie of anything they do. With Holly's third book - she Leslie have turned their immensely creative eye to what they do best, decorating....but, with a twist. Decorating with FLOWERS. What's not to love? Broken down into themes - which is always a help to readers, I was particularly enchanted with the Pastels Neons .. and the Girly Glam sections. Now, as a girl that tends to be a neutral (beige / grey / cream) girl -- the fact that these sections spoke to me what a real surprise. That just shows how talented

these lovely ladies are. They can make a simple "I don't take color chances in my home" girl into a freak for neon. I also really love a good resource or materials section. The "What's in our Cabinet" was a treasure trove of items that I know now my life will not be complete without. I love when that happens. The beauty of this book is the ease that you feel while reading it. You truly believe that you will be able to duplicate or even be inspired to try your own version of their vignettes. Holly Leslie know their readers -- they understand their design aesthetic. It's an open friendly book that hits all the highlights and a wonderful addition to my design / creative library. Beautiful -- grab one for yourself. 2 of 2 people found the following review helpful. Stunning book!
