Justyna Kacprzak : Dinosaur Amigurumi before purchasing it in order to gage whether or not it would be worth my time, and all praised Dinosaur Amigurumi:

11 of 11 people found the following review helpful. Pattern ErrorsBy PaSpirit56So far I have done 2 of the patterns and both had an error. One is a major error, the other is minor. The Apatosaurus pattern on page 33 is the wrong pattern...it is the same pattern as Parasaurolophus on page 61. Apatosaurus doesn't have a crest. It should have a long neck. There is also an error on page 59. Row 31 instead of 21sc it should be 22sc, 3 in 1, turn, ch 1 (25 sts). I haven't even tried the other patterns yet. Wondering what else I will find. My granddaughter wanted the long neck...I guess not, at least until I find another pattern.9 of 9 people found the following review helpful. Missing Apatosaurus pattern. Duplicate patterns.By Wendy Thuy KorzI got this book as a gift. The very first pattern I tried to make was the Apatosaurus. I could tell it was wrong from the first 2 rows instructions. After further investigation, it turns out the

Apatosaurus pattern is an exact copy of the Parasaurolophus pattern. So there is no pattern for the Apatosaurus. Please give us the pattern for this dinosaur. 4 of 4 people found the following review helpful. Fun Dinosaur Amigurumi that are easy to stitch. By iiiiireader. Dinosaur Amigurumi by Justyna Kacprzak is a easy to read and fairly easy to crochet set of dinosaurs. The pattern directions are well thought out and written. The dinosaurs themselves are quite cute and should be a hit with any dinosaur lover. As they are a little on the simple side (which is best for me as a crocheter), don't look for a lot of detail and definition. The dinosaur patterns included in this book are: 1. Dimetrodon 2. Ankylosaurus 3. Pachycephalosaurus 4. Stegosaurus 5. Mosasaurus 6. Corythosaurus 7. Apatosaurus 8. Tyrannosaurus rex 9. Tropeognathus 10. Edmontosaurus 11. Triceratops 12. Elasmosaurus 13. Pterodactyl 14. Parasaurolophus. The patterns call for Cotton-ish by Vickie Howell for Bernat yarn and use a size C (2.75mm) hook. The directions are definitely for US format crochet. The eyes used are (per dinosaur) either 2 each 4.5 or 6mm safety eyes depending on which dinosaur you are stitching. You will also need to pick up stuffing of your choice. My preference is polyester but you can use whatever you prefer. There are very simple general directions at the beginning of the book. There are multiple cute pictures of each dinosaur from various angles, so it is easy to get an idea of how the finished product should look. While the author gives the hook size needed, as far as I can see (given I am looking at a pre-release version of the book), there is not stitch gauge given. Depending on your tension, you may want to move a hook size up or down to get the result that you prefer. My grandson's bedroom is decorated in dinosaurs, so I am really pleased to see such a great set of patterns to make for him. I will be purchasing a paper version of this book for my craft library and can hardly wait to start stitching some of the designs. I received a temporary digital ARC copy of this book from the publisher, Dover Publications, via Netgalley.

Geared toward practitioners of amigurumi, the Japanese art of crocheting stuffed dolls, this is the only how-to book dedicated to dinosaur patterns. Learn how to crochet fourteen adorable prehistoric creatures to cuddle, from familiar species such as Tyrannosaurus rex, Triceratops, and Stegosaurus to Mosasaurus, Edmontosaurus, and other lesser-known but equally lovable varieties. Each project features complete, well-illustrated instructions, plus full-color photos of the finished model. The patterns are easy to follow and are suitable for crocheters at all skill levels, from novices to experienced hands.
