Right now I am going to do a search for more books by Ms. King. This is a great resource for the dollhouse maker, miniatureist(?) and

even for recyclers. Using ordinary house hold items, such as a salt shaker (or pepper) Ms. King shows the reader how to create a stove for a doll house. There are several stoves, fireplaces, and accessories created using things that might other wise end up in the trash. I can hardly wait to get started. You won't be sorry if you buy this book.0 of 0 people found the following review helpful. This is one of my favorite dollhouse booksBy Bonnie HinrichsenThis is one of my favorite dollhouse books! It has clear instructions to make stoves and fireplaces. I want to make everything in this book. A must for every dollhouse aficionado.

Use inexpensive objects and very basic tools to craft realistic-looking, miniature stoves and fireplaces. From garage-sale treasures to recycled grocery packaging, you'll be amazed by the range of supplies that can be used to finish a dolls' house with style and authenticity. Transform several small picture frames into an ornate Victorian fireplace with a mantel. A small plastic bottle forms the perfect basis for a cooking stove, and a lipstick tube can become a portable heater. There are also plenty of suggestions for making accessories such as fire irons, mantel clocks, and pots and pans. Full-color photographs, materials lists, and detailed instructions and diagrams make it easy for any dolls' house enthusiast to get right to work!
