**Jean Nisbett : Dolls' House Inspirations** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dolls' House Inspirations:

13 of 13 people found the following review helpful. Colorful book with lots of "Inspirations".By University DocThis is a newer book, which I just added to my miniaturist book collection. I've skimmed through this book twice already, and read through once. The author uses lots of photos of finished houses, the house before it is built and then, afterwards, with it completely furnished. Info about each house is also included with tips and advice.The book is broken down into four parts. The author covers Period houses, European Houses, gardens and garden buildings and practical advice. The Georgian House, in particular is a work to be admired. An ostentious work with it being over 7ft high and 5ft wide and 5ft deep, it took the retired couple who designed it seven years to build. I can only imagine how much it cost to construct.The only caveat I have about this book is that everything that is made in this book is from a

kit, and not from scratch. It does a fine job of inspiring one to begin, or move along with a miniature project, but does nothing at motivating one with ideas from scratch. 3 of 3 people found the following review helpful. Good for period dollhouses. By Kindle Customer If you want to stay true to a particular period in history for your dollhouse this is a good book. Otherwise, it doesn't give much help or inspiration for those of us that like to mix and match. I was hoping for some cheaper ideas also and these pieces are quite expensive - it is nice to look at but after one look I didn't feel the need to look again. 0 of 0 people found the following review helpful. Five Stars By Sue Larson Very pleased with this purchase.

Modern miniaturists are ready to tackle a wider and more challenging range of projects than ever before. Whether you are a collector who wants a fully furnished dolls house, a miniaturist who wants a ready-made house to decorate, or a hobbyist who wants to make a house from a kit, you'll find a huge variety of exciting projects and ideas here from Tudor designs, to a Georgian mansion; from a French farmhouse, to a 17th century Dutch home. Outdoors enthusiasts are not forgotten either, with whole sections on gardens, and garden buildings, such as an orangery and a summerhouse. Illustrated throughout with lavish color photography, this beautifully realized source of inspiration is sure to provide many hours of pleasure.
