Get out the PVA glue and get going!By Enigma SmithDolls' House Shops, Cafes RestaurantsThis book just makes me want to make stuff and isn't that what it's all about? Aside from the fact that you'll never again put a scrap of cardstock or the top of a pill bottle in the recycling bin again, there's not one project in this book that doesn't make the mini enthusiast want to get sticky fingers. Best of all, unlike a lot of other books, DH Shops doesn't insist on polished perfection. A lot of the vignettes contain objects that show the hand of the maker and it's obvious that Nisbett just really likes to MAKE things. She has some high-end minis in her rooms but she also has lots of box top endtables, framed postcards and walls covered with gift wrap that are within everyone's means. I guarantee you'll find tons of great ideas and lots of inspiration to get you taking a second look at that empty antacid bottle. Highly recommended.0 of 0 people found the following review helpful. This book I love because, it has
