Found it with McMenemy's one of a kind custom car book. I absolutely love the attention getting front and back covers. The print color intensity of the covers is astounding. The inside paper quality is also good. One car printed per page, with the back of the page blank. Would be nice if the pages were perforated so they could be torn out for framing, but there is plenty of room to easily cut them out of you wanted to. The shipping was extraordinarily quick. I ordered the book on a Monday and had the coloring book in my hands by Thursday afternoon, far sooner than I expected. I highly recommend this product and if it's a hit with the kid, I may be ordering more coloring books from this artist.

Doodle Garage is the latest coloring book created by artist and designer Sean McMenemy. In it you'll find 50 Custom Cars, Truck, Vans and Hot-Rod Style Spaceships to color any way you want. You can even draw your own patterns on the sides of the cars! I've always loved custom cars ever since my Dad took me to the "World of Wheels" in Kansas City when I was a kid. I've always admired the work of George Barris, and now Chip Foose and Kindig-It Design. These guys bring true art to car building and they are true artists and craftsmen. They inspire craftsmanship and design every time I see their work. They all have made me want to draw cars as long as I can remember. Hum Maybe I have George Lucas to thank for this too? "American Graffiti" and "Star Wars" both were about fast moving hot-rods! I created a colorpage website you can find at <http://colorbook4nerdlings.com> there I create books with sci-fi and fantasy themes.
