Antonio Roman : Eero Saarinen: An Architecture of Multiplicity before purchasing it in order to gage whether or not it would be worth my time, and all praised Eero Saarinen: An Architecture of Multiplicity:

Eero Saarinen was one of the great masters of American twentieth-century architecture, and the only one whose career and work has not been documented in a comprehensive monograph until now. Saarinen's buildings are famous world-wide and include such landmarks as the TWA Terminal at JFK Airport in New York, Dulles Airport outside Washington, the General Motors Technical Center in Michigan, the CBS building in New York and many others. He is also celebrated for his furniture designs, including the Tulip Table and Womb Chair. His exuberant, expressive forms are now much admired, making him a key figure for many architects and designers working today. This lavishly illustrated monograph spans Saarinen's entire career, including his drawings, models, most important built works and

furniture. Eero Saarinen is essential for anyone interested in modern architecture and design.
