EXQUISITE INTERCEPTORS, the sister book and this one is a must have. Very detailed instructions that anyone can follow. Thay, dont let this art form go away, you must have another book in you! 0 of 0 people found the following review helpful. Really nifty paper planes By Joshua Koppel As an origami fan, I prefer paper airplane books that rely on folding techniques as opposed to cutting/taping/gluing/paper clipping techniques. This is a wonderful collection of realistic paper airplanes that really fly. Clear drawings and instructions make it very easy to duplicate the beautifully crafted designs. A nice companion to the author's book EXQUISITE INTERCEPTORS. A must-have for fans of paper airplanes. 1 of 3 people found the following review helpful. Good Beginners Book for Paper Airplanes By A Customer Most planes look pretty good and

all fly well. A vary good book for beginners.

The new edition of Thay Yang's Exotic Paper Airplanes has been expanded and even further simplified. Written and illustrated by an award-winning artist, this book will teach you how to fold exquisite paper airplanes that soar far beyond the basics, using only an ordinary sheet of paper. No cutting is necessary; with Thay's unique folding techniques you can easily create detailed, accurate replicas of the F-14 Tomcat, the Concorde, the Stealth Fighter, the Star-Fighter, the F-18 Hornet, the Mig-27, and many more.

From Scientific American From the simple, sweeping lines of the Concord to the complex engine cowling, stabilizers and tail fins of the F-14 Tomcat, each step of the process, every fold and twist has been beautifully and clearly illustrated by the author. From The New Yorker Exotic Paper Airplanes is just that...a book that shows how to fold intricate and different paper airplanes from any type of paper. An impeccable guide of new and unique folding techniques for a variety of planes. -- Publishers Weekly These paper airplanes soar like the real thing! An ordinary sheet of paper is all you need; no cutting required! Unique folding techniques to create detailed and accurate replicas of the Concord, Star Fighter, Stealth, Hornet, MIG-27, and others. Written and illustrated by Laotian-born Thay Yang, senior aesthetics award winner in the Great International Paper Airplane Contest, sponsored by the Seattle Museum of Flight. John Collins, author of the best-selling book, The Gliding Flight, calls Thay "a master folder." Now everyone can learn Thay's unique folding techniques to create the Future Fighter, Viggen Fighter, F-15, F-18 Laser Jet, Bomber, F-14 Tomcat and many other aircraft. --From the Publisher
