If you can only have one Applica Book then this should be it!By Doyle K.Hard backed with pages that will fold out flat for easy reading and reference . H. Hargrave has covered a wide spectrum of different techniques to produce true applique using the typical home sewing machine. Note that

these techniques are to sew cut fabric pieces substituting the machine stitching for traditional hand stitching as opposed to gluing or bonding pieces together. Contains a wealth of information and reference material. Well thought-out instructions with lots of detailed photographs and diagrams. This is a techniques book and thankfully not full of the authors on quilts being displayed. It does contain full sized patterns and assembly instructions to get you started. Emphasis is on learning how to do it your self - where the real JOY is. Good Luck and enjoy. DK.0 of 0 people found the following review helpful. From Library JournalAnyone with a desire to master machine applique can do so by taking the time and effort to work through this beautifully organized manual. Hargrave has authored a number of critically acclaimed quilting books, including Heirloom Machine Quilting and From Fabric to Fiber. Machine applique has become more attractive to the home sewer with the advent of modern sewing machines and new fusibles and stabilizers to make the technique more easily mastered. This second edition updates the earlier volume with methods, materials, and techniques that have come to the fore since the first edition was published ten years ago. After an extensive discussion of equipment and supplies recommended for machine applique and of sewing machine maintenance and troubleshooting, Hargrave covers raw-edge techniques like the satin stitch and the blanket stitch as well as invisible machine applique on a turned-edge. Close-up step-by-step photos of critical techniques are included. This practical workshop-in-a-book is eminently suitable for both solitary learners and workshop participants and is highly recommended for all public libraries with fabric crafts collections.
