Szalome Nyiro : Mennyország ablakai (Hungarian Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mennyország ablakai (Hungarian Edition):

A hand-painted coloring and story book for adults and children. The book includes four illustrated Hungarian stories, fifty-five coloring pictures and thirteen cute squirrel pictures for children. Meet with acorn-lover squirrels, curious circus elephant, always naughty kitty, hanky-panky snails, glorious sunflower and the ever-blooming flowers. These characters come alive, the moment you drop your pen. Let my friends invite you into this wonderland of magic, have a peak through windows of heaven. It might just light up your days or totally change your life!

About the Author Szalome Nyiro is a kindergarten teacher. Currently she is teaching English for young learners in

Asia. In her free time she likes to paint, for her joy and for people around her. She has been a passionate painter since her childhood. Though, she has never learnt from professionals; friends and family who appreciate her work always describe it as spontaneous or heavenly joyful. Her paintings are combinations of everything beautiful in her mind the moment she made it. It can be shapes, curves, flowers, butterfly, elephants, castles or some figures you might have never seen on Earth! It's hard to describe to people her joy and peace every time she paints, unless they do it with her. That is why she would like to keep her works undone, and let every person be a painter with her book. Let your imagination flow with her lines and figures. That is her dreams come true!
