Model Machines Are Real Machines Made to ScaleBy John MahlerWhen a lad, I owned many models of various machines from bronze age catapults to Civil War cannon. My father and I spent many an enjoyable afternoon learning from and enjoying a small steam engine I had acquired at a rummage sale. Later we built a Hero style turbine from a used tin of tuna. I have always enjoyed models and continued to build them as a grown man. I have built steam engines and several types of Stirling engines. I built several successful Tesla Turbines. I have yet to build a proper bladed turbine as disclosed in this volume. I want to build and do everything. Like the child whose eyes are bigger than his stomach, my appetite for machines is greater than my anticipated life span.
