I greatly appreciate the late author's conversational writing style. Heavily illustrated and well written, I am glad to have added it to my reference library.3 of 3 people found the following review helpful. Shepherd Paine is a MasterBy Jay GerakFor those who are just getting into military modeling, Shepherd Paine is THE authority on model and diorama building. This book includes many of the techniques he discussed/introduced decades ago in the how-to pamphlets included in the Monogram WWII series of

models kits. Paine describes in detail his techniques including weathering and scratchbuilding items of equipment. Highly recommended. 2 of 2 people found the following review helpful. A must for ATV builders! By tika7019 This is the classic "how to" book for the ATV modeler. Although it is an older book, it is full of so much good information, it will never become dated.

Basic techniques of assembly, painting, scratchbuilding, weathering, and detailing for building realistic armor models. Includes hundreds of photos and drawings with tips for realistic modeling and creating battle damage.
