Deep into the mind of Mike (and Laura) ALLRED By Stan FREDO A must-have for every fan of the ALLREDS, this book is a revealing journey through their career as told by Mike ALLRED himself. All major influences and like-minded contemporaries are cited, acknowledged and praised so that you can check them out for yourself. Before I read that book I suspected that the late Yves CHALAND (and the whole "ligne claire" movement from the 1980s : Ted BENOIT, Serge CLERC et al.) was an influence and was very pleased to find that my intuition was right. This book is also useful to take good note of

what Mike ALLRED has produced that you missed... and probably will still miss when you'll find out they are out of print! One star off for the lack of color and, most of all, of a bibliography at the end of the book.

A few short years into his blossoming career, Mike Allred struck just the right chord when he introduced his hip, Pop-inspired creation Madman! The series won the Harvey Award for Best New Series, and from there Allred was well on his way, going on to create The Atomics and the critically acclaimed Red Rocket 7, as well as illustrate the fan-favorite X-Force/X-Statix series for Marvel Comics. So pull on your go-go boots and do the watusi it's time to explore the weird and wonderfully way-out worlds of Mike Allred!
