Judy Hardman, Sally Pinhey : Natural Dyes before purchasing it in order to gauge whether or not it would be worth my time, and all praised Natural Dyes:

0 of 0 people found the following review helpful. I have several books on natural dyeing and i have ...By Caryl R. Hancock I have several books on natural dyeing and i have found that they all offer differing information, and that I will never be a natural dyer! 3 of 3 people found the following review helpful. Lots of uncommon dye plants and great sample photos. By book's author I own a lot of dye books and I would definitely include this as one of my top five favorites. It lists so many more (unusual) plants than other books and the yarn sample photos on each page are better than the color chip guides for accuracy. Love it.

This volume describes the use of plants that can be grown in the garden or collected from the countryside. It is lavishly illustrated with accurate and detailed botanical watercolors and samples of the colors the plants produce. Topics covered include five different garden designs using dye plants; a step-by-step guide to dyeing wool, silk, and cotton; solar dyeing; and how to dye felt in all forms.

About the Author Judy Hardman has been spinning, weaving, and dyeing yarns for more than 30 years, using wool provided by her own flock of Shetland sheep. She regularly runs workshops and gives talks. Sally Pinhey teaches botanical illustration.
