There are so many fun projects and even though he won't be able to do them quite yet with our

son (he's 2 months), my husband will be doing some of them to test them out. The funny thing is all of his friends are more than ready and willing to also do the experiments and other fun nerdy things. The only downside I could possibly think of are the potential messes i'll have to clean up, oh well, I did it to myself for getting these super fun books for my boys (ok, and me, I can't wait to geek out with them)!! 1 of 1 people found the following review helpful. By Joshmindseye Fantastic book with a lot of activites!!! Only thing I wish it had, would be projects for slightly younger children. My son is only 5 and most these projects are for 10 and up.
