**James Hamilton, Stumpy Nubs : The Homemade Workshop: Build Your Own Woodworking Machines and Jigs** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Homemade Workshop: Build Your Own Woodworking Machines and Jigs:

0 of 0 people found the following review helpful. I think I luv Stumpy....By Bo BoWell written and some great ideas. Plus U have videos to watch on u tube if you want some more ideas. I can't wait to actually build some of these. I have four or five highlighted for my first attempts. I just bought a router table, but now I want to build one. :) 1 of 1 people found the following review helpful. Great book I have built a couple already and they ...By CustomerGreat book I have built a couple already and they work...Company has contacted me when needed...try it, you will enjoy it...2 of 2 people found the following review helpful. Great book. Very detailed plans that anybody can read ...By

CustomerGreat book. Very detailed plans that anybody can read and build these projects. This book shows stumpy nubbs passion for woodworking and that spills over to the reader. Can't go wrong with this book

Less cost! More features! Bragging rights!Let's face it: Woodworking isn't cheap. Wood and materials alone can cost a small fortune. And well-designed commercial woodworking machines are often so expensive that they are beyond the reach of many home woodworkers. So what's a woodworker to do? Do what Stumpy Nubs does and build your own!In The Homemade Woodshop, James Hamilton, creator of the popular Stumpy Nubs website and editor of Stumpy Nubs Woodworking Journal, shows you how to build woodworking machines for a fraction of the cost of store-bought models--and with more features to boot! You'll discover 12 detailed projects for building precise, durable shop-made machines including:Sliding-top router table that makes joinery safe and easyMulti-function downdraft table that combines dust collection with countless workholding applicationsSliding crosscut table that gives your table saw the precision and convenience of a high-end European saw24" band saw that offers all of the throat capacity of an industrial model in a size that will fit on a benchtopCrosscut "super-sled" that allows you to create box joints, splined miters, tenons and moreTable saw workstation that affords you a complete workshop in a 4' x 8' footprintAnd 7 more!The projects in this book not only save you money, but they allow you to add more features and, ultimately, greater precision and more versatility to the machines in your shop. And let's face it: Having a shop outfitted with machines that you built yourself is just cool.

About the AuthorJames Hamilton (aka Stumpy Nubs) is a professional woodworker, author, teacher and editor of Stumpy Nubs Woodworking Journal- a fully digital monthly woodworking publication. His work has been featured across the industry and his innovative jig and tool designs have earned him a large following. His website (stumpynubs.com) is among the most popular in the craft.
