If I were just rating the information in the "book" I would have given it a 4+ but I really hate the Kindle version because it is so difficult to get to the individual blocks. In order to find each block you have to scroll through the whole book page by page until you find the one you want. I had expected to be able to "link" through to the block by tapping the block number which is accented in a similar blue as a hyperlink. It is not user friendly and I wish I had just found a print version to buy.
