Lovely Book.By Laurie H.This is one of the loveliest books I have gotten in a long time! This book is perfect for your coffee table or to leave out as a decoration, but is useful too. I love the pictures and I also love the ideas in the book. There are so many good ideas in the book that I would highly recommend it if you are into scenting your house and coming up with new ideas on how to accomplish that. I found some new ideas on how to create more scent and it is now one of my favorite books. It would make a nice gift too. I am glad I purchased it.0 of 0 people found the following review helpful. I love the Author and the bookBy chattycathyI ran into this book in the early part of 2000 when I was learning to garden and craft with dried flowers. My biggest interest was making potpourri but I soon learned to make sachets and many other projects. I got so carried away with it that I soon recruited local florists to save flower heads they were not going to use for me and about three days a week I made my rounds to all the shops. This book is a great learning tool if you are considering gardening and crafting with flowers and herbs. There is also a list of resources for botanical supplies, she covered every aspect of

decorating with flowers as well as gardening and crafting.
