I saw vegan soap was at an indoor mall (BX) at an Air Force base in Florida. I took notes because it comprised an interesting business plan. Now, after reading this book, I just need to look for ingredients and get started. If you're looking for a local home-based business project, it's easy to get started, and this book has all the info you need: Equipment Ingredients; Cold Process vs. Hot Process in Soap Making; and The Process of Homemade Vegan Liquid Soap. Pretty cool, if you ask me ...0 of 0 people found the following review helpful. This is why we find that so many people are very interested in learning how to make their own soap. Vegan soap is slowly gaining popularity, and there are many reasons for this. First of all, there is the fact that there are absolutely no additives to be found in homemade vegan soap that can be harmful to the skin. Who Says That There's No Short-cuts to Soap Glory?
