book on a hunch my 9 yr old daughter would enjoy it, and she loves it. The book is well written for the 8-13yr old age group. Do avoid the kindle version though, the free chapter 1 preview was pretty bad at getting text that needs to go with drawings and diagrams together. After reading the first chapter in the free kindle version on my PC, I almost didn't buy it because the drawings just didn't make any sense without the required text nearby-when I received the book I could tell it was just bad translation-great reading for young girls. 1 of 1 people found the following review helpful. Four Stars By Stephen Staveley Grouse Trade , A + ! 10 of 10 people found the following review helpful. Cooler Girl Scout Handbook! By In The Night Kitchen Wonderful book to give to elementary school age girls with just enough science to make it -- dare I say? -- a *sneaky* way to make science accessible. Plus, there's a lot of clever tips and tricks that anybody will enjoy. It's a cooler version of a girl scout handbook.

Thank you, Cy . . . for opening up the world of tinkering and creativity to a whole new generation . . . looking to get their hands dirty with new and exciting projects." --NPR's Ira Flatow, host of Science Friday Like a real MacGyver, Tymony is hoping to save the world one gizmo at a time." --Los Angeles Times Cy Tymony's The Sneaky Book for Girls picks up where The Daring Book for Girls left off. While The Daring Book for Girls includes pointers on secret note-passing skills, The Sneaky Book for Girls goes one step further by showing gals how to write a note in invisible ink, craft the note into a sneaky Frisbee, and then properly recycle the note after its secrets have been divulged. In addition to profiles of more than a dozen famous women, this clever book also provides complete how-to instructions, along with diagrams for sneaky gadgets, survival skills, magic tricks, communication codes, science and crafting projects, as well as recycling and conservation techniques.

About the Author Cy Tymony has been creating homemade inventions since childhood. He has appeared on CNN Headline News, ABC's Chicago Morning Show, and NPR's Science Friday with Ira Flatow, and he has been featured in the Chicago Tribune and Future Life magazine.
